As used herein, the term “computer[s]” refers to any desktop, laptop, or other mobile computing device owned or issued by the Isle of Wight Academy to any student for school use. The term “privately-owned computer[s]” refers to any privately-owned desktop, laptop, or other mobile computing device. The term “computer services” refers to the school’s network or Internet connections used to access school or Internet-based information.

All students are responsible for their actions and activities involving computers and/or computer services, and for their computer files, passwords and accounts. The use of computer resources is a privilege and must be treated as such by all students. These rules provide general guidance concerning the use of the computers and/or computer services and examples of prohibited uses. The rules do not attempt to describe every possible prohibited activity; students, parents and school staff who have questions about whether a particular activity is prohibited are encouraged to speak to the Technology Coordinator. These rules apply to all computers and/or school computer services regardless of how they are accessed.

The school reserves the right to access and monitor all aspects of its technology systems and devices, and students should not expect any information stored on IWA equipment or systems to be private.

- 6. Use for Non-School Purposes.** Using computers and/or computer services for any personal reasons not connected with the educational program or school assignments is permissible so long as those uses do not constitute a violation of the “Prohibited Uses” section of these rules and/or are not interfering with the educational purpose of these devices by the student or others.
- 7. Misuse of Passwords/Unauthorized Access.** Students at Isle of Wight Academy will be assigned a username and password. Students will login to Isle of Wight Academy systems using this information. Students may not share passwords, use other users’ passwords, access or use other users’ accounts, or attempt to circumvent the network security systems and/or computer services. Under no circumstances should a student attempt to find out another student’s password or attempt to access that student’s email or personal files.
- 8.
